Current CDE Writing Standards Seventh Grade 1997

Strategies	
Organization	<p>Create an organizational structure that balances all aspects of the composition and uses effective transitions between sentences to unify important ideas.</p> <p>Use strategies of note taking, outlining, and summarizing to impose structure on composition drafts.</p>
Evaluation and Revision	<p>Revise writing to improve organization and word choice after checking the logic of the ideas and the precision of the vocabulary.</p>
Use Reference Materials/ Research and Technology	<p>Give credit for quoted and paraphrased information in a bibliography by using a consistent and sanctioned format and methodology for citations.</p> <p>Identify topics; ask and evaluate questions; and develop ideas leading to inquiry, investigation, and research.</p>
Focus	<p>Support all statements and claims with anecdotes, descriptions, facts and statistics, and specific examples.</p>
Format/ Penmanship	<p>Create documents by using word-processing skills and publishing programs; develop simple databases and spreadsheets to organize information and prepare reports.</p>
Applications	
Narrative	<p>Write fictional or autobiographical narratives:</p> <p>a.) Develop a standard plot line (having a beginning, conflict, rising action, climax, and denouement) and point of view.</p> <p>b.) Develop complex major and minor characters and a definite setting.</p> <p>c.) Use a range of appropriate strategies (e.g., dialogue; suspense; naming of specific narrative action, including movement, gestures, and expressions).</p>
Expository	<p>Write summaries of reading materials.</p> <p>a.) Include the main ideas and most significant details.</p> <p>b.) Use the student's own words, except for quotations.</p> <p>c.) Reflect underlying meaning, not just the superficial details.</p> <p>Write research reports:</p> <p>a.) Pose relevant and tightly drawn questions about the topic.</p> <p>b.) Convey clear and accurate perspectives on the subject.</p> <p>c.) Include evidence compiled through the formal research process (e.g., use of a card catalogue, <i>Reader's Guide to Periodical Literature</i>, a computer catalogue, magazines, newspapers, dictionaries).</p> <p>d.) Document reference sources by means of footnotes and a bibliography.</p>
Response to Literature	<p>Write responses to literature:</p> <p>a.) Develop interpretations exhibiting careful reading, understanding, and insight.</p> <p>b.) Organize interpretations around several clear ideas, premises, or images from the literary work.</p> <p>c.) Justify interpretations through sustained use of examples and textual evidence.</p>
Letter	<p>None</p>
Persuasive	<p>Write persuasive compositions:</p> <p>a.) State a clear position or perspective in support of a proposition or proposal.</p> <p>b.) Describe the points in support of the proposition, employing well-articulated evidence.</p> <p>c.) Anticipate and address reader concerns and counterarguments.</p>

Current CDE Writing Standards Seventh Grade 1997

Conventions	
Punctuation	Demonstrate the mechanics of writing (e.g., quotation marks, commas at end of dependent clauses), and appropriate English usage (e.g., pronoun reference). Identify hyphens, dashes, brackets, and semicolons and use them correctly.
Capitalization	Use correct capitalization. Spell derivatives correctly by applying the spellings of bases and affixes.
Spelling	None
Grammar	Place modifiers properly and use the active voice. Identify and use infinitives and particles and make clear references between pronouns and antecedents. Identify all parts of speech and types and structure of sentences.

Grade 7 Writing Standards – New California Common Core Standards

Source: www.cde.ca.gov/ci/cr/cf/suptsupmatreview.asp

Text Types and Purposes		
7. W 1	Write arguments to support claims with clear reasons and relevant evidence.	
7. W 1a.	Introduce claim(s), acknowledge and address alternate or opposing claims, and organize the reasons and evidence logically.	
7. W 1b.	Support claim(s) or counterarguments with logical reasoning and relevant evidence, using accurate, credible sources and demonstrating an understanding of the topic or text.	
7. W. 1c.	Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), reasons, and evidence.	
7. W 1d.	Establish and maintain a formal style.	
7. W 1e.	Provide a concluding statement or section that follows from and supports the argument presented.	
7. W 2	Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content.	
7. W 2a.	Introduce a topic or thesis statement clearly, previewing what is to follow; organize ideas, concepts, and information, using strategies such as definition, classification, comparison/contrast, and cause/effect; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension.	
7. W 2b.	Develop the topic with relevant facts, definitions, concrete details, quotations, or other information and examples.	
7. W 2c.	Use appropriate transitions to create cohesion and clarify the relationships among ideas and concepts.	
7. W 2d.	Use precise language and domain-specific vocabulary to inform about or explain the topic.	
7. W 2e.	Establish and maintain a formal style.	
7. W 2f.	Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content. Provide a concluding statement or section that follows from and supports the information or explanation presented.	
7. W 3	Write narratives to develop real or imagined experiences or events using effective technique, relevant descriptive details, and well-structured event sequences.	
7. W 3a.	Engage and orient the reader by establishing a context and point of view and introducing a narrator and/or characters; organize an event sequence that unfolds naturally and logically.	
7. W 3b.	Use narrative techniques, such as dialogue, pacing, and description, to develop experiences, events, and/or characters.	
7. W 3c.	Use a variety of transition words, phrases, and clauses to convey sequence and signal shifts from one time frame or setting to another.	
7. W 3d.	Use precise words and phrases, relevant descriptive details, and sensory language to capture the action and convey experiences and events.	
7. W 3e.	Provide a conclusion that follows from and reflects on the narrated experiences or events.	

Grade 7 Writing Standards – New California Common Core Standards

Source: www.cde.ca.gov/ci/cr/cf/suptsupmatreview.asp

Production and Distribution of Writing		
7. W 4.	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)	
7. W 5.	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.	
7. W 6.	Use technology, including the Internet, to produce and publish writing and link to and cite sources as well as to interact and collaborate with others, including linking to and citing sources.	
Research to Build and Present Knowledge		
7. W 7.	Conduct short research projects to answer a question, drawing on several sources and generating additional related, focused questions for further research and investigation.	
7. W 8.	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.	
7. W 9	Draw evidence from literary or informational texts to support analysis, reflection, and research.	
7. W 9a.	Apply <i>grade 7 Reading standards</i> to literature (e.g., “Compare and contrast a fictional portrayal of a time, place, or character and a historical account of the same period as a means of understanding how authors of fiction use or alter history”).	
7. W 9b.	Apply <i>grade 7 Reading standards</i> to literary nonfiction (e.g. “Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims”).	
Range of Writing		
7. W 10.	Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.	
Language: Conventions of Standard English		
7. L 1	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.	
7. L 1a.	Explain the function of phrases and clauses in general and their function in specific sentences.	
7. L 1b.	Choose among simple, compound, complex, and compound-complex sentences to signal differing relationships among ideas.	
7. L 1c.	Place phrases and clauses within a sentence, recognizing and correcting misplaced and dangling modifiers.*	
7. L 2	Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.	
7. L 2a.	Use a comma to separate coordinate adjectives (e.g., <i>It was a fascinating, enjoyable movie</i> but not <i>He wore an old[,] green shirt</i>).	
7. L 2b.	Spell correctly.	

These are the California Common Core writing and language standards from the CDE website reformatted and coded with checkbox by Knox Education .
They are available on our website at knoxeducation.com inside the Standards Toolkit/Common Core Standards in each grade level, grades K-8.

Grade 7 Writing Standards – New California Common Core Standards

Source: www.cde.ca.gov/ci/cr/cf/suptsupmatreview.asp

Language: Knowledge of Language		
7. L 3a.	Use knowledge of language and its conventions when writing, speaking, reading, or listening. Choose language that expresses ideas precisely and concisely, recognizing and eliminating wordiness and redundancy.*	
Language: Vocabulary Acquisition and Use		
7. L 4	Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on <i>grade 7 reading and content</i>, choosing flexibly from a range of strategies.	
7. L 4a.	Use context (e.g., the overall meaning of a sentence or paragraph; a word's position or function in a sentence) as a clue to the meaning of a word or phrase.	
7. L 4b.	Use common, grade-appropriate Greek or Latin affixes and roots as clues to the meaning of a word (e.g., <i>belligerent</i> , <i>bellicose</i> , <i>rebel</i>).	
7. L 4c.	Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning or its part of speech <u>or trace the etymology of words.</u>	
7. L 4d.	Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).	
7. L 5	Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.	
7. L 5a.	Interpret figures of speech (e.g., literary, biblical, and mythological allusions) in context.	
7. L 5b.	Use the relationship between particular words (e.g., synonym/antonym, analogy) to better understand each of the words.	
7. L 5c.	Distinguish among the connotations (associations) of words with similar denotations (definitions) (e.g., <i>refined</i> , <i>respectful</i> , <i>polite</i> , <i>diplomatic</i> , <i>condescending</i>).	
7. L 6.	Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases; gather vocabulary knowledge when considering a word or phrase important to comprehension or expression.	

Samples of Student Writing

Following are writing samples that have been annotated to illustrate the criteria required to meet the Common Core State Standards for particular types of writing—argument, informative/explanatory text, and narrative—in a given grade. Each of the samples exhibits at least the level of quality required to meet the Writing standards for that grade.

The range of accomplishment within each grade reflects differences in individual development as well as in the conditions under which the student writers were expected to work. Some of the samples were written in class or as homework; others were written for on-demand assessments; still others were the result of sustained research projects. Where possible, each sample includes information about the circumstances under which it was produced. The samples come from students in kindergarten through grade 12. The students attended school in a number of states and districts across the country.

At the lower grades, the samples include “opinion” writing, an elementary type of argument in which students give reasons for their opinions and preferences. Because reasons are required, such writing helps prepare students for drafting the arguments they will be expected to create beginning in grade 6.

Acknowledgment

The Standards work group would like to express its appreciation to teachers and students at Monte Vista High School in California and the Randolph Technical Career Center in Vermont; other colleagues in California, Massachusetts, and Washington state; and ACT, Inc., and the *Concord Review*, who helped find and obtain permission for several of the samples included in the set. The group also would like to express its appreciation to the New Standards Project and to the International Reading Association, which allowed the use of several samples from their publications, and to the other student writers who granted permission to reproduce their work here.

Permissions

The following student writing samples have been reprinted for the Common Core State Standards Initiative with the express permission of the following organizations and individuals.

ACT, Inc.:

Untitled essay on dress codes

California Department of Education:

“Football”; “Miss Sadie”

The *Concord Review*:

“In the Wake of the Spanish Lady: American Economic Resilience in the Aftermath of the Influenza Epidemic of 1918” by Brooke Granowski, *Concord Review*, 20(1), 203–216 (©2009 Concord Review, Inc.)

Massachusetts Department of Elementary and Secondary Education:

“Dear Mr. Sandler”; “A Pet Story About My Cat . . . Gus”; “Animal Farm”

Monte Vista High School in California:

“The True Meaning of Friendship”; “Lives on Mango, Rides the Whale”; untitled essay on civil disobedience in India; “Marching to His Own Beat”; “Summary of Key Points”

The National Center on Education and the Economy, on behalf of New Standards:

“My fabit Book is do you Want to be my FRIEND”; “Fraggs (Frogs)”; “I Went to Disnand”; “My Big Book About Spain”; “I bot a little cotton ball”; “Owl Moon”; “My first tooth is gone”; “Horses”; “When my Puppys Ranaway”; “Zoo Field Trip”; “Author Response: Roald Dahl”; “Getting Shot and Living Through It”; “A Geographical Report”; “The Old Man and the Sea”; “_____ School Bond Levy”

Randolph Technical Career Center in Vermont:

“Wood Joints”; “TIG/GTAW Welding”

Washington State Office of Superintendent of Public Instruction:

“Glowing Shoes”; “Video Cameras in Classrooms”

Permission to reprint each of the following samples was granted by its author:

“Freedom From Structure”; “Fact vs. Fiction and All the Grey Space in Between”; “The Making of a Human Voice and How to Use It”

Student Sample: Grade 7, Argument

This argument was produced for an on-demand assessment. Students were asked to write a letter to their principal about a plan to install video cameras in the classroom for safety reasons. The abbreviated time frame of the assessment (and the consequent lack of opportunity to perform research and revise) explains the absence of information from sources and possibly also the occasional errors.

Video Cameras in Classrooms

You are seated in class as your teacher explains and points things out on the whiteboard. You twitch your hand, accidentally nudging your pencil, which rolls off your desk and clatters to the floor. As you lean over to pick up your pencil, your cell phone falls out of your coat pocket! Luckily you catch it without your teacher seeing, but it is in plain view of the video camera's shiny lens that points straight at you. The classroom phone rings, and after a brief conversation, your teacher walks over to your desk and kneels down beside you. "About that cell phone of yours . . ." How did that get you in trouble? How could it possibly be a good idea to put cameras in classrooms?

When students are in their classrooms, teachers are in the classroom too, usually. But when a teacher goes out of the classroom, what usually happens is either everything goes on as usual, or the students get a little more talkative. Cameras aren't there because people talk a lot. It is the teacher's job to keep people quiet. If something horrible happened, somebody in class would usually report it, or it would just be obvious to the teacher when he came back that something had happened.

If we already have cameras in the halls, why spend the money to get thirty more cameras for all the different classrooms? Our school district already has a low budget, so we would be spending money on something completely unnecessary. There hasn't been camera-worthy trouble in classrooms. Camera-worthy trouble would be bad behavior every time a teacher left the room. There is no reason to install cameras that might just cause trouble, both for the students and for the budget.

Different students react differently when there is a camera in the room. Some students get nervous and flustered, trying hard to stay focused on their work with a camera focused on them. 90% of students claim that they do better work when they are calmer, and cameras are not going to help. Other students look at cameras as a source of entertainment. These students will do things such as wave at the camera, make faces, or say hi to the people watching through the camera. This could be a big distraction for others who are trying to learn and participate in class. Still other students will try to trick the camera. They will find a way to block the lens or do something that the camera will not be likely to catch. All of these different students will be distracted by the cameras in their classrooms.

Instead of solving problems, cameras would cause the problems. That is why I disagree with the idea to put cameras in classrooms. This plan should not be put to action.

Annotation

- **introduces a claim (stated late in the essay).**
 - *. . . I disagree with the idea to put cameras in classrooms. This plan should not be put to action.*
- **acknowledges alternate or opposing claims.**
 - *Instead of solving problems, cameras would cause the problems.*
- **supports the claim with logical reasoning and relevant evidence, demonstrating an understanding of the topic.**
 - *[Cameras are not necessary because] [i]f something horrible happened, somebody in class would usually report it, or it would just be obvious to the teacher when he came back that something had happened.*
 - *. . . we already have cameras in the halls . . .*

- *Our school district already has a low budget . . .*
- **uses words, phrases, and clauses to create cohesion and clarify the relationships among the claim, reasons, and evidence.**
 - *If . . . already . . . why . . . so . . . Some students . . . Other students . . . These students . . . All of these different students . . .*
- **establishes and maintains a formal style.**
 - *When students are in their classrooms, teachers are in the classroom too, usually. But when a teacher goes out of the classroom, what usually happens is either everything goes on as usual, or the students get a little more talkative.*
 - *Different students react differently when there is a camera in the room.*
- **provides a concluding statement that follows from and supports the argument presented.**
 - *Instead of solving problems, cameras would cause the problems. That is why I disagree with the idea to put cameras in classrooms. This plan should not be put to action.*
- **demonstrates good command of the conventions of standard written English (with occasional errors that do not interfere materially with the underlying message).**

Student Sample: Grade 7, Informative/Explanatory

The extended project that led to this scientific report required students to review existing research, conduct original research, and produce a report. Although the student who wrote the report was in grade 7, the conceptual understanding the report displays is clearly at an exemplary level.

A Geographical Report

My report is on a very rare and unique wetland that many people do not even know exists. They occur only in a few places around the world.

My topic is created by a specific geographical condition. Vernal pools in San Diego occur only on the local mesas and terraces, where soil conditions allow, but these are the ideal place for much of the city's urban and agricultural development. Is it possible to find a balance between the two conflicting purposes of expansion and preservation?

This raises an interesting question; how can you establish vernal pools being thought of as a geographical asset?

METHODS

To answer my question I had to get information on vernal pools: what they are, where they are, and how they are a sensitive natural habitat. Then I needed to examine how city expansion is affecting vernal pools, and if it is apt to continue. I needed to know what the City thinks about the problem and what they are planning to do.

First I looked for any information available on vernal pools at public libraries, but I couldn't find what I was looking for. The topic is apparently too obscure. Next I went to a university library that had an environmental department to get as much information as possible (University of San Diego).

I also interviewed several authorities in the field: the district representative for the U.S. Army Corps of Engineers, the federal agency responsible for the protection of wetlands; a senior environment planner with the City of San Diego, who wrote the City's Resource Protection Ordinance (RPO); the Station botanist at Miramar Naval Air Station, who is in charge of their vernal pool management plan on the land that has the largest number of pools remaining in the City of San Diego; a biologist working for RECON (Regional Environmental Consultants), a firm which is mapping the vernal pools for the City of Hemet, (another city in San Diego County facing the same issues); and finally a geographer working for SANDAG (San Diego Association of Governments), a regional organization that gathers, records, and analyzes data associated with regional planning and environmental issues. They answered many questions and offered their own ideas and information, including additional articles on my subject. I looked at several maps and photos of vernal pools locations, and charts of changing land use.

To decide how much education may be needed about vernal pools, I made a questionnaire, and surveyed two classrooms of elementary students, and a group of forty-two adults, trying to cover most age groups.

WHAT VERNAL POOLS ARE

Vernal pools are a unique and rare form of wetland. Wetlands are areas that are covered or soaked by water enough to support plants that grow only in moist ground. Some examples of wetlands are bogs, swamps, marshes, and edges of lakes and streams. These are what people think of when they hear "wetland". But vernal pools are different than these other types of wetlands. They are located on dry and flat places. No one would expect to find a wetland in such a dry area!

San Diego vernal pools are surrounded by small mounds called "mima mounds". The name mima mounds come from the Mima Prairie near Olympia, Washington. People don't know for sure how mima mounds are formed. Some think that they were formed by gophers piling up the earth. Others think that ice wedges from glaciers caused the upheaval, or maybe the wind pushed loose dirt, catching in clumps of shrubs. Mounds can be found on prairies or terraces with a hardpan or clay layer underneath.

Vernal pools are depressions between the mima mounds. In winter the pools are filled by rain storms. In spring the pools look their best, when plants are in full splendor. By summer the pools are dry and look only like a dry pothole, (See illustration of pool cycles and typical cross section.) A vernal pool does not dry by soaking into the ground; the layer of clay or rock underneath the pool prevents the water from soaking through. Instead they dry out from evaporation, or use by the plants. The mima mounds are not impervious so one pool tends to drain into another. Therefore, the pools have to be on flat land; the pools cannot be on a slope or the water would run off, and the pools would not be filled.

[Illustration here]

Typical Cross Section of Vernal Pool

[Illustration here]

Vernal Pool Cycle

WHY VERNAL POOLS ARE SO IMPORTANT

Vernal pools are a very rare, specific habitat. Hardly any are left, so we don't have many to lose. There used to be vernal pools on many of the mesas and terraces of San Diego County, and the Central Valley of California. Now there are almost no vernal pools in the Central Valley, and an estimated 97% have been lost in San Diego County. An estimated 80% of the remaining pools in San Diego are located on Miramar Naval Air Station. (See map, next page.)

[Illustration here]

Vernal Pool Distribution, San Diego County

It does not take much to disturb a vernal pool. Even grazing or off road vehicle use in the summer, when pool species are dormant and people could think they are just a dry hole, can damage them. Most are disturbed by grading and flattening of their habitat, or by breakup of the impervious layer. With just flat land there would be no depressions for vernal pools to form; what would form would be "vernal mud". With no impervious layer the water would just sink into the ground, and would be there only for a short period of time, not enough for wetland plants.

The mima mounds have to be protected too. If the watershed for the pools is changed, the condition of the pools changes. If there isn't enough water from runoff, then all plant or animal life in them disappears, because they need enough moisture at the right time, to live. If there is too much water, then the pool may turn into another kind of wetland, such as a bog.

Although people have begun to study them, there is still a lot to learn. One thing scientists know is that they are a part of a larger environment. Many animals travel from other areas to feed on plants or animals, or drink from the vernal pools. For example, water fowl from many other places will stop at the pools to eat the fairy shrimp and snack on the plants.

Vernal pools have a large assortment of rare and exotic flora and fauna (plants and animals). Five of them are on the federal list of endangered species, and one more is a candidate for listing. The plants and animals in vernal pools are unusual because they have only developed recently compared to other changes in evolution. As scientists study the pools more intently they are finding more and more unknown species. There are temporary pools in other places around the world, but California's vernal pools are different because of their long drought phase, which causes the plants and animals to adapt to the climate. They go into a dormant phase. For example, fairy shrimp lay eggs before the drought which hatch when it gets moist enough to be active. Some plants, in a short period of time, develop seeds; others appear to die out, but quickly spout again from the rain. Many of these species cannot survive outside vernal pools, and some are "endemic" (species found only in a very restricted geographical area).

PROTECTION TECHNIQUES

The first step is to try to keep development away from vernal pools. But to do this you first need to know where the pools are. Thanks to regional mapping efforts, existing vernal pools have been fairly well identified in San Diego County.

2011-12 Compiled from California Department of Education website by Charlotte Knox, Knox Education: www.knoxeducation.com

There are already laws against disturbances of vernal pools. You could go to jail or get fined a large sum of money for disturbing a wetland. The U.S. Fish and Wildlife Service protects the listed endangered species present, and the U. S. Army Corps of Engineers makes sure you don't fill any kind of wetland habitat, including vernal pools. The local office of the U.S. Army Corps of Engineers has submitted a proposal to Washington for a stricter permit process for vernal pools.

When possible the vernal pools should be part of a large preserve of open space. That way the pools would not be isolated islands, but part of their natural communities, and would be protected by a buffer of distance. Fences should not be put directly around the vernal pools unless it cannot be avoided, because it would keep some animals out, such as rabbits which spread plant seeds around when they eat them.

It is important to educate people about vernal pools so they know how important they are and what they look like, and so they know how to preserve them. To see how much education may be needed in San Diego, I surveyed ninety-two people (forty-two adults and fifty elementary students to try to cover all age groups). I asked them if they had heard of vernal pools, and if they knew what they were. About 21% thought they had heard of them, but only 7% really knew what they were. (See pie chart.) I found that much education is needed.

[Illustration here]

Survey Results

At N.A.S. Miramar the Station botanist has been putting articles dealing with vernal pools in almost every issue of the base newspaper. Now most people on the base know about vernal pools, and know how valuable they are.

RECOGNIZING AN ASSET

Education is a key to preserving vernal pools. Vernal pools are very unique and we do not have many to lose. Making new ones does not work. Studies done at the University of California, Santa Barbara, have shown that after five years their complexity goes down.

First, vernal pools must be protected. There could be different ranges of accessibility, from remote (available to research only), somewhat accessible (good for guided seasonal visits), to readily accessible (which may have to be protected by fencing or supervision). The most accessible ones would be a great educational opportunity for the general public. The pools closer to development could be developed into nature centers, with raised boardwalks to protect the habitat, as is done over the hot springs in Yellowstone. (See illustration.)

[Illustration here]

Cross Section of Possible Nature Center

Interpretive signs and docents could provide information. Being very unique, vernal pools would make interesting learning centers. People would learn how the plants and animals adapt to the seasonal changes. This would teach people the importance of vernal pools, how complex they are, how to identify them, and how to preserve them when wet or dry. A park in the Sacramento area has an adjacent vernal pool with hiking trails around it; and it seems to work there because the people there know how important and delicate it is.

Ecotourism, a popular concept now, would be another idea. San Diego is a place where tourists already come. The very climate and geography that brings people here is what created vernal pools. Ecotourism would be easy to add to the other attractions, and would indirectly benefit the city. A tour company might be authorized to place advertisements to bring people to learn the importance of vernal pools and their ecosystem. With many people outside San Diego knowing about vernal pools and concerned about their well-being, there would be widespread support for vernal pool protection.

CONCLUSION

The problem of endangering vernal pools will not go away, because the City will need more land to develop. However, vernal pools remain a rare and unique wetland, and need protection. Even though there are laws made to protect them, pools are still being lost. Education is needed. Widespread education showing how important vernal pools are, and how easy they are to disturb, will create widespread support for protection.

A balance between expansion and preservation will not come easily, but if the public views vernal pools as a geographical asset, the balance will shift toward long-term vernal pool preservation.

- **introduces the topic clearly, previewing what is to follow.**
 - *My report is on a very rare and unique wetland that many people do not even know exists. . . . Vernal pools in San Diego occur only on the local mesas and terraces, where soil conditions allow, but these are the ideal place for much of the city's urban and*

agricultural development. Is it possible to find a balance between the two conflicting purposes of expansion and preservation?

- **organizes ideas, concepts, and information, using strategies such as definition, classification, comparison/contrast, and cause/effect.**
 - *Definition: Vernal pools are a unique and rare form of wetland. . . . Vernal pools are depressions between the mima mounds. . . . Vernal pools are a very rare, specific habitat.*
 - *Comparison/contrast: Some examples of wetlands are bogs, swamps, marshes, and edges of lakes and streams. . . . But vernal pools are different than these other types of wetlands. They are located on dry and flat places.*
 - *If/then and cause/effect: If the watershed for the pools is changed, the condition of the pools changes. If there isn't enough water from runoff, then all plant or animal life in them disappears, because they need enough moisture at the right time, to live.*
- **includes formatting and graphics when useful to aiding comprehension.**
 - *The writer uses a number of headings to help section off the text: METHODS, WHAT VERNAL POOLS ARE, WHY VERNAL POOLS ARE SO IMPORTANT, PROTECTION TECHNIQUES, RECOGNIZING AN ASSET, and CONCLUSION.*
 - *The writer offers a cross-section of a vernal pool, an illustration of the vernal pool cycle, a map of the distribution of vernal pools in San Diego County, a pie chart of responses to a survey, and a cross-section of a possible nature center.*
- **develops the topic with relevant facts, definitions, concrete details, quotations, or other information and examples.**
 - *Vernal pools are a unique and rare form of wetland. Wetlands are areas that are covered or soaked by water enough to support plants that grow only in moist ground. Some examples of wetlands are bogs, swamps, marshes, and edges of lakes and streams.*
 - *San Diego vernal pools are surrounded by small mounds called "mima mounds".*
 - *. . . the layer of clay or rock underneath the pool prevents the water from soaking through. . . . an estimated 97% [of vernal pools] have been lost in San Diego County.*
- **uses appropriate transitions to create cohesion and clarify the relationships among ideas and concepts.**
 - *Vernal pools are a very rare, specific habitat. Hardly any are left, so we don't have many to lose.*
 - *First, vernal pools must be protected.*
 - *Ecotourism, a popular concept now, would be another idea.*
- **uses precise language and domain-specific vocabulary to inform about or explain the topic.**
 - *Vernal pools . . . habitat . . . wetland . . . bogs . . . mima mounds . . . pool cycles . . .*
- **establishes and maintains a formal style.**
 - *Vernal pools are a unique and rare form of wetland. Wetlands are areas that are covered or soaked by water enough to support plants that grow only in moist ground.*
 - *Vernal pools have a large assortment of rare and exotic flora and fauna (plants and animals). Five of them are on the federal list of endangered species, and one more is a candidate for listing.*
- **provides a concluding section that follows from and supports the information or explanation presented.**
 - *A balance between expansion and preservation will not come easily, but if the public views vernal pools as a geographical asset, the balance will shift toward long-term vernal pool preservation.*
- **demonstrates exemplary command of the conventions of standard written English.**
